**Subject:** Water Committee Meeting Notes

Paul,

I dug through my computer to try and find any notes, minutes, agendas, etc related to the water committee while I was chair. It turns out my record keeping was worse than I remembered; I only located two related files on this topic. We did not have the board secretary in attendance at these meetings to take formal minutes, nor did we designate a formal note-taker, so these notes are barebones and were made with the intent to remind myself of actions that needed to be taken. The notes were never really intended for mass distribution. I have attached both files to this email.

Thanks,  
Skyler
